📍 Nairobi, Kenya

## SUMMARY

Dynamic software engineering graduate from ALX with a strong foundation in project development and collaboration. Equipped with practical experience and academic knowledge, ready to contribute to innovative software solutions in a collaborative environment.

## EXPERIENCE

### Peer Learning Ambassador

ALX

📅 10/2023 - Present 📍 Remote

ALX Africa

- Selected as a Peer Learning Ambassador to foster collaboration and knowledge sharing among peers
- Organized and facilitated learning sessions on various topics, including Python programming fundamentals, web development best practices, and software design principles.
- Supported fellow students in their learning journey, providing guidance and assistance in areas such as debugging, project management, and code optimization.
- Recognized for leadership and dedication in promoting a culture of continuous learning and professional growth.

## PROJECTS

### E-commerce Website

📅 11/2023 - 12/2023

Graduation Project.

Developed a Flask-based e-commerce site with user authentication, product management, and checkout functionality. Created an admin page for efficient product and order management. Contributed to backend development, deployment, and enhancing user experience.

### Blog Post Website

📅 03/2024 - 03/2024

Designed and implemented a blog post website using the Flask web framework, allowing users to create, edit, and delete blog posts. Implemented features such as user authentication, CRUD operations for blog posts, and integration with a database system. Played a key role in developing the backend logic, routing, and database interactions.
